HENRY FIELD'S SEED SENSE

"FOR THE MAN BEHIND THE HOE"

Published by Henry Field in His Radio Print Shop

Vol. XXII

SPECIAL CATALOG EDITION—Shenandoah, Ia., Jan. 1, 1938

No. 1

Picking a Bushel of Health

This is Henry Bell's daughter, Opal, out picking apples in their orchard. Henry is a good customer of mine up in Iona, So. Dakota, and apples don't grow as easy up there as they do here. Looks like an Anoka or Cortland about 4 years old.

Please Order Early!

Please help me out this year, and yourselves, too, by ordering early. The free gifts below are for ordering early and I want you to pick out just what you like best, there, and I'll send it along free.

Early orders always get the pick of everything and the best service. When it comes to field seeds, I've seen lots of times a man saved over \$20 and \$30 by ordering before the spring price raises.

So send those orders in now and do yourself and me a favor. Thanks. H. F.

P. S. Don't worry about ordering nursery stock too early. Send your order now and I'll reserve the stock for you and ship it when it's correct planting time there where you live.

Ozark Grown Blue Bells

Yes, I will have a few of the Mertensia Blue Bells again this spring that I will bring up from my Ozark place. They are 19c each; 3 for 49c or 7 for 98c, postpaid. You'll find them on page 34 and a colored picture on page 43.

Mary Mary, How Does Your Garden Grow?

The trouble with that headline is that the fine looking, ambitious young lady's name is Josephine Oldfield, from up in Washington, Iowa. The picture was sent in by C. F. Timmons.

Now, that's what I call real ambition and the right way to make garden—get the urge and start early. She's doing a man's size job and has on man's size boots to prove it.

50c Apiece for Pictures

You folks know, I can't put out a Seed Sense without plenty of letters and pictures. And, I'm willing to pay for them. Here's what I'm going to do.

Send me those pictures—of your tulips, alfalfa, Atlas, flower bed, lawn, kids, stock — anything you want. If I can use them, I'll pay 50c each when I do. The only rule is, that they must be extra prints that you don't want back for I never know which I can use until each Seed Sense time. The best one of all, sent in, will get \$5. Fair deal?

The Modern Way to Garden

This is Mrs. J. L. Hovey and the two fine looking grandchildren are Norma Helen and Wayne Lester from down in South Fork, Missouri. She gardens the easy way, with a wheel hoe (like pictured on page 42) and the picture proves it does a 100% job.

Mrs. Hovey says she has flowers planted all along the fence because she likes to look at them while working in the garden.

Do You Know How to Plant?

Don't worry, if you don't. Every order I send out has complete planting instructions with it, covering a lot of different items. Even you old experts might find something interesting in it.

And, of course, every garden and flower seed packet has the cultural directions printed right on it. Even if you know planting backwards and forwards, I hope you read it.

These Catalogs Free

Can't get everything I want into one catalog. This is my big seed book, but I have others from time to time. Here's a list of them. They're free for the asking. Just mention the one you're interested in, on your order, and I'll mail it right out to you.

BIRD and FISH Catalog (with all supplies, too); PAINT Catalog; TIRE Circular; HARNESS Catalog; SHOE Catalog; CHICK Guide and PRESSURE COOKER Leaflet.

Yes, they're all Free.

FREE GIFTS FOR EVERYBODY!

This is my way of saying "THANK YOU, COME AGAIN." You'll get other surprise free gifts, too. H. F.

MY OWN CORNER FOR "JUST VISITIN'"

Just Sittin' Watching My Garden Grow

Yes, sometimes the boss just sits. Not very often though. Usually, you folks keep me humping. But it doesn't hurt most of us to now and then take time off just to sit and watch the world go by. We'd all be better off if we did more of it.

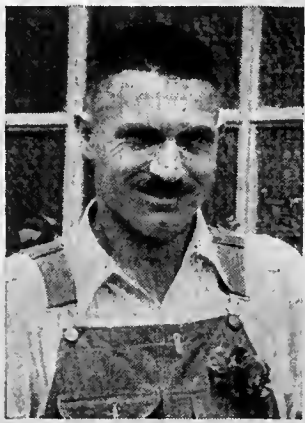

John Henry Married

When Mrs. Field and I took our trip to California, we stopped at Pueblo, Colorado, to see John Henry and his new wife.

John Henry took a job out in Pueblo early this summer, met a mighty nice girl and was married July 24.

They are all set up fine in a nice apartment.

That's Mrs. Field, Ethel (my new daughter-in-law), John Henry, and myself.

Here's Frank

Here's my eldest, smiling as usual. He's back at the Seed House after a few years work out at the stores.

Frank talks every day over the radio, helps the Nursery Department and is general right hand man.

Notice the pansies in his buttonhole. You very seldom ever see him without flowers around somewhere.

I call this my own page. The rest of the book is written to suit you and all the rest of the folks. It must be done just about right. No mistakes, no wrong grammar, and no waste space.

But this page, I write just to suit myself. If it don't suit you, you don't have to read it. You can go on and read the rest of the book and come back to this later when you haven't anything else to do.

I've had a lot of fun getting this catalog ready. How do you like the big, new size, anyway? I kind of thought you'd like it a lot better and besides, I can get a lot more pictures on the pages. So I'm trying it out. If it pleases you, say so on your orders.

It's been a great year, hasn't it? How has it treated you? We came through with flying colors. Seems like every customer brings in two or three new ones, and they keep us humping. They're all welcome. And right now I want to thank all of you for telling your friends about me. It's the best kind of advertising I could have. And I'll try to live up to your recommendation 100%. If any of you have given away, or do give away, your catalog to a neighbor, I'll send you another. Glad to do it.

And the letters we've been getting are the best part of the seed business. I'd rather read your letters than eat. Keep them coming, and the pictures, too. I can't put out a Seed Sense without them.

I suppose you read Seed Sense. It's free with an order. We're going to print about four or five again this year and you'll probably get one in a month or so, if you've sent in an order by that time.

I hope you all have fine gardens this year. I'm planning a bigger one down at my Ozark Cabin and, of course, one here at Shenandoah.

Plan on having the best garden you ever had. Of course, you ought to buy your seeds of me, but whether you do or not, read the catalog through or just look at the pictures, and you will get a lot of good ideas about gardening that won't cost you a cent.

Now I won't bother you any more, and you can go ahead and read the catalog and fill out the order sheet in the back. Of course, I want an order. Even if it's not a very large one, send it along. It takes orders to keep this business going and I know I can do you some good in the seed line. The business couldn't succeed, if I didn't. Or, if you can't send an order, or come see me, write me a letter anyway. Whether you order or not, you can be friendly. And if I can help you in any way with advice or information, just help yourself.

Write soon, goodbye.

HENRY FIELD.

Don't Look Now!

"Don't look now, I think I'm going to slide off. Why doesn't Henry Field make a square watermelon?" That's Miss Lillie Dusek from way down in Lovake, Texas, and a mighty healthy looking customer of mine. I think of everything I sell, kids like watermelons the best.

Guaranteed Nursery Stock

My nursery stock is all state inspected, free from disease and the heaviest quality, and first class in every way, or I don't send it out. That's why I can guarantee it.

If you're not pleased in every way, notify me within 5 days and I will replace it at once. I guarantee it to reach you in first class, live growing condition. After that, up to October 1, we take only half the blame, (weather one-half) and replace at half price anything unsatisfactory through any fault of the stock.

Fair enough?

A Squash Recipe

I never cared a terrible lot for Squash until this year. But we have gotten to eating these Delicata and Table Queen squashes a new way. First you cut the Squash open, from end to end, take out the seed, and fill the center with fresh pork sausage with a little sage and onion mixed in. Put the halves back together again and bake in a good hot oven. Believe me, you've got something, then.

About Postage

Most every item in my catalog is postpaid. I pay the postage on all garden seeds, all flower seeds, and most nursery items.

But some nursery, like big fruit and shade trees, can't go by parcel post, so I quote the price not prepaid. There are just a few of these and all are plainly marked. That means, you pay the express when it arrives.

But, if your total nursery order is over \$10, I will pay all the charges here. Most of you know this, but I thought I'd remind you again.

Buy At the 5 or 10 Rate

I want everybody to be sure and take advantage of my low quantity rates on fruits, shrubs, etc. You don't have to order all one kind of fruit trees to be able to use the low prices. You just have to order that many fruit trees.

Suppose you bought 5 apples and 5 cherries. Then, use the 10 rate. Suppose you bought 5 Spirea and 5 Lilac. Then use the 10 rate. The same is good with perennials, shrubs, grape vines, etc.

Take advantage of it.

Here's What Your Neighbors Say

"I wish to thank you for a fine garden saved by your combination Bug Dust. It cleaned the green lice from the peas, black lice from my beans, and striped bugs from my cucumbers—not to say anything about the cabbage worms." Mrs. Ross Ritchey, Rt. 3, Woodbine, Ia.

"Dear Henry: Your Bug Dust spreads easily, kills the bugs and does not injure the plants as some insecticides do." Mrs. H. E. Hazen, Toulon, Ill.

"Dear Sir: This being my third order for Bug Dust, I can truly say that it is the best, or I can go one better, it is the ONLY Bug Dust. I wouldn't garden without Field's Bug Dust." L. M. Morrison, Churdan, Ia.

Save Your Garden—Use Bug Dust!

Government figures, just released, show that one-tenth of all the food raised, goes to feed insects. They eat up over THREE BILLION dollars worth of food a year.

That doesn't mean, of course, that you'll lose any three billion dollars. But, anyway you look at it, bugs are mighty pesky, especially when they move in and eat up a garden you've hoed and tended all year.

There's one SURE way to stop them and that's with BUG DUST. It's made out of the new dust called ROTENONE which is 38 times as powerful as Arsenate of Lead, and still NON-POISONOUS. It's both an insecticide and a fungicide and stops disease as well as bugs.

I'm the only one who sells it. I heard of the discovery three years ago and made this dust. It's cheap, powerful, and safe and I sell a world of it. Over 20,000 customers bought it last year and most of them were people coming back for more.

So it must be good! See page 42.

Safe to Use

Bug Dust is absolutely safe to use. You can put it right on your lettuce in the morning and eat it at noon without washing it, and it won't hurt you, but it will get the bugs. It's cheap, too, considering it protects about \$100 worth of vegetables in your garden.

Goodbye Feed Shortage

You can say goodbye to feed shortages if you plant Sudan. This is a picture sent in by R. J. Gustafson of Kiron, Iowa. He says: "I enjoy your Seed Sense very much, so am sending you this picture of the Sudan I got of you. It sure was a dandy field with all shocks higher than my head. All the other seed yielded good, too."

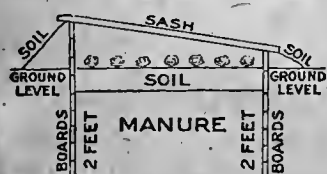

Watermelons—2 Lbs. for \$1.00

I had a lot of farmers try this last year. Dump 2 lbs. of watermelon seed in your corn planter box on one side and plant some rows of watermelons right in with your corn.

One fellow, here, made \$1600 off of 8 A. of melons and another made \$450 from 2 A.

I'm going to repeat my special offer of last year. Either 2 lbs. of seed ($\frac{1}{4}$ lb. of 8 choice varieties, my choice) or 2 lbs. of a grand mixture of 20 or more varieties for \$1.00, postpaid. There's a bargain and a good idea. Try it.

How to Make a Hot Bed

You'll find lots of ways printed, but I think this is the most practical of all.

My plan is dig an ordinary hole, 2 or 3 feet deep and a little larger than the hot bed being made. Fill full of manure, preferably fresh horse manure with plenty of straw and tramp it down to about 4 in. above ground level.

Make your frame of 1 in. boards and put on top of manure and fill inside with dirt 4 in. deep. Make one side 12 in. high and one 8 to get slope. Bank the dirt thrown up around the side. Cover with glass cloth or glass on the top, and you are ready.

The main thing is to get your cabbage and tomato plants started early. You can do this, without a hot bed in a south window indoors.

New Odorless Cabbage

You've probably read a lot about this in the farm papers and magazines. It's a regular cabbage of a mild sort only it hasn't the cabbage smell. Some folks tell me they like it better than the regular kind. You'll find it there on page 7.

Field's Famous COFFEE

4 lb. for \$1.00

10 lb. for 2.50

All Postpaid

ter than any other coffee, regardless of price or it won't cost you a cent. If it doesn't, send back what you haven't used, and I'll refund every cent.

If you want a stronger guarantee, write it yourself. I'll stay hitched. The main thing is to try REAL coffee now. Prices low.

Women folks like my cloth bag for making towels, aprons, bags, etc., too.

Lucky Daisies!

Here's a sunbonnet and a little girl out watering the daisies. They're mighty lucky daisies to get such good care. They're not quite as big as the GIANT Supremes I'm giving away Free on page 3, but they're mighty nice and happy looking. This is Merle Krause from over at Elmhurst, Ill.

New Things

Yes, a seedsman has to keep up-to-date, too. Every year I add new things (if they are good) and get new and better strains of old favorites.

You'll see a lot of them as you go through the catalog. Here's just part of a list of some I want you to notice for sure. Don't have room for all.

Sugar Lump Melons—No Wilt Beans—New Super-Gold Popcorn—New Slicer Tomato—New Wilt Resistant Watermelons—New Mule Hybrid Sweet Corn—New King of the North Peppers—New Yellows-Resistant Cabbage—New Odorless Cabbage—New Squash, and a lot more.

Mother Won't Miss This One

"Mother won't miss just one. There are so many on this rose bush she got from Henry Field. Mother says it's an American Beauty Climber. Aren't they pretty?" This is Betty Lee Barton and her great grandmother, Mrs. James Graham of Bloomfield, Iowa, sent this one in. Both the roses and the little girl are mighty nice, aren't they?

FREE! 100 GLAD BULBLETS with each collection

ABOUT THE BULBLETS

These proved so popular last year, I am going to give 100 free with each garden seed collection this year.

Glad bulblets are the ideal way to start a big "glad" garden. Usually they are called Seedsmen's Size, because seedsmen buy and sell them among themselves and grow blooming size bulbs out of them.

No reason why you can't have them, too. About 10% bloom the first year, and all the second year. Believe me, they make lovely glads.

300 FREE WITH TWO COLLECTIONS!

YOUR GARDEN IS AS GOOD AS THE SEED—PLANT THE BEST

WHAT'S FINER THAN A NICE GARDEN?

Good seed, good soil and good people make good gardens. And a good garden, well tended like the one in the picture is bountiful in its rewards. A little effort on your part gives you all the fresh healthy vegetables you can eat, and a world of contentment and peace which is just as important.

Plant a garden and let your neighbor worry about food bills.

GREEN POD BUSH BEANS

BURPEE'S STRINGLESS GREEN POD

107 The ideal family bean and the "measuring stick" to which all varieties are compared. Very early, meaty and tender. No strings, whatever. If I could have only one kind, it would be this one. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 18c; 1 lb. 30c; 3 lbs. 80c, postpaid.

ROUND POD VALENTINE

112 An old favorite. Regarded by many for years as the standard green pod sort. Very hardy. Stands handling and shipping well. Long, round, and nearly straight. I like this one, too. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 15c; 1 lb. 30c; 3 lbs. 80c, postpaid.

BOUNTIFUL

144 You folks here in the corn belt ought to grow more of this one. Its home is in the south and they plant lots of it there. I have had it for years and like it better all the time. Never had a failure. Big, green, showy pods. Of good quality and a fine yielder. Canners like it and it is fine for market. Bountiful is the right name. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 20c; 1 lb. 35c; 3 lbs. 80c, postpaid.

STRINGLESS BLACK VALENTINE

119 Another new one. A little late but it stands hot weather nicely and deserves to be better known. The pods are round, long and stringless. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 18c; 1 lb. 30c; 3 lbs. 80c, postpaid.

TENDER GREEN

106 Here is a new one. Extremely early. Strong, vigorous plants with long dark green pods practically straight and without a sign of a string. It is making worlds of friends and I am almost ready to say it is the finest of all green pod beans today. Haven't heard a single word against it. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 18c; 1 lb. 30c; 3 lbs. 80c, postpaid.

FIELD'S FIRST EARLY

109 This one originated in Tennessee. I got it from there years ago. It is early, a good yielder, stringless, and for flavor you can't beat it. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 18c; 1 lb. 30c; 3 lbs. 80c, postpaid.

ABOUT SEED IN GENERAL

Nothing is more important to a gardener or farmer, except maybe the weather, than his seed. The seed has got to be good or a person might just as well get exercise by hoeing and watering the barn floor.

I believe I sell seed as cheap as anyone in the country—I always have—but there's one thing I won't do and that is cut quality. If I say some variety is good you can count on it that every seed will grow, that it will be true to name, and 100% as I say it is.

That sounds like a lot of bragging but it's every bit true. Don't, please don't, buy cheap bargain seed of someone you don't know. I'd rather see you plant sand. At least you don't have to pay for it.

Good seed is important to you. And I intend to see that you get good seed. I've done it now for 50 years and hope to do it for another 50. Satisfying you keeps me in business.

ABOUT BEANS

I believe every family should plant at least five or six pounds of beans. (See my special 3 pound prices.) I always have a good supply of seed beans handy. Whenever any of the early or mid-season things run out, I fill in the spaces with beans.

A pound will plant two rows 50 feet long. Start your plantings as soon as severe frosts are over and plant every two weeks until the middle of July. You will have fresh, crisp beans all season. Beans like a rich, warm soil.

Yellow Podded BUSH BEANS

GOLDEN "NO WILT"

123 The bean that resists disease! I've been selling seed for 49 years, and this is the finest wax podded bean I have ever offered. It's an improved type of the Rustproof Golden Wax. Will grow where other varieties fail. The pods are somewhat flat, absolutely stringless, an inch or more longer than Golden Wax. Very heavy yielder. Will eventually be the leading wax bean. By all means, include this in your planting this year. Price: Triple size pkt. (3 oz.) 15c; ½ lb. 25c; 1 lb. 40c; 3 lbs. \$1.00, postpaid.

NEW IMP. STRINGLESS YELLOW POD

117 Here is an improvement that is bigger and better than the old strain in every way. The pods are large, round and tender. Absolutely stringless and of the finest flavor. It is about the earliest bean I know. Vines are hardy and vigorous and very productive. The pods grow in clusters. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 20c; 1 lb. 35c; 3 lbs. 80c, postpaid.

CUCUMBERS

ABOUT CUCUMBERS

They like rich soil but they do fairly well most anywhere. Plant liberally because the bugs sometimes take some of the seedlings. Don't crowd cucumbers, give them plenty of room. Make the hills at least 4 x 6 feet and more room if you have it. Plant when the ground is warm and figure about 3 dozen hills to a packet of seed or 100 hills to the ounce. For late pickles, plant in June. Cucumber bugs are easily stopped with BUG DUST which is non-poisonous. See page 42.

PICKLING VARIETIES

Mrs. Field has a dandy recipe for making pickles. It's free if you ask for it on your order.

NATIONAL PICKLES

352 Makes the finest of crisp uniform pickles, any size you will want them from small wee ones to dill size. They set on freely and continue to bear as long as you keep them pickled. The shape is ideal; they pack without waste. Price: Pkt. 5c; oz. 12c; ¼ lb. 30c, postpaid.

HEINZ'S PICKLE

356 Developed especially for those who put up their own small pickles. Cylindrical in shape, very robust in growth and more rust resistant than other varieties. Keep pickled off, and it will give you worlds of small pickles. Price: Pkt. 5c; oz. 15c; ¼ lb. 35c, postpaid.

CHICAGO PICKLE

351 The old standby. Med. color. Very early and prolific. Pkt. 5c; oz. 12c; ¼ lb. 30c, postpaid.

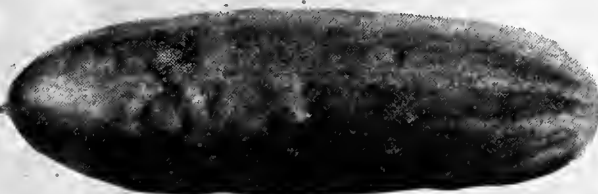

CLARK'S SPECIAL

EARLY FORTUNE

353 To my notion, one of the finest of the medium early sorts. Disease resistant, a very vigorous grower and will produce an enormous crop of dark green cucumbers. Holds its color well and has a small seed cavity. Price: Pkt. 5c; oz. 12c; ¼ lb. 30c, postpaid.

COLORADO

354 A beautiful new variety which has national reputation. It is long, white spine, rich dark green in color. Slender, medium early, very productive, flesh snowy-white, tender and crisp. Price: Pkt. 10c; oz. 20c; ¼ lb. 45c, postpaid.

DARK GREEN SLICER

364 As the name indicates, it is a rich, deep, dark green in color, and slices remarkably well. Straight, rather blunt ended. Is early, bears well and doesn't have "nubbins." Price: Pkt. 5c; oz. 12c; ¼ lb. 30c, postpaid.

SNAKE CUCUMBER

365 An unusual new sort that looks like a Muskmelon but really is a Cucumber. It is a strong and vigorous grower. The fruits often are three feet long, and they grow in all sorts of twisted up shapes. A novelty but makes good eating too, if you like dill pickles or sliced pickles. Try a few of them. Price: Pkt. 10c; oz. 20c; ¼ lb. 45c, postpaid.

WHITE WONDER

363 Very popular as a novelty on account of its color. Pure white in all stages of growth. Produces heavy, has a fine flavor, and is well worth trying. Price: Pkt. 5c; oz. 12c; ¼ lb. 30c, postpaid.

CLIMBING CUCUMBER

366 A distinct climbing variety, used to cover trellises and fences. The cucumbers themselves are dark green, very uniform, very attractive. Plant some on the chicken yard fence. Price: Pkt. 10c; oz. 20c; ¼ lb. 45c, postpaid.

IMPROVED LONG GREEN

361 A medium-late variety which has a small seed cavity and is ideal for slicing. One of the most popular and widely used varieties. Price: Pkt. 5c; oz. 12c; ¼ lb. 30c, postpaid.

LEMON CUCUMBERS

359 Fruit 3½ inches long and nearly round. Lemon yellow color, with white spine. Fine quality. Makes good pickles, good for slicing and for stuffing. Price: Pkt. 5c; oz. 15c; ¼ lb. 35c, postpaid.

ABOUT MUSKMELONS

I'm proud of my muskmelon seed. I don't believe there is another seedsman in the country who has spent as much time fussing with the growers, inspecting crops and worrying about his melon seeds. Every variety is grown by a specialist in an isolated place where it doesn't get a chance to mix with anything else. Plant them after the ground is warm. Figure about three dozen hills for one packet of seed or 100 hills from an ounce. Give them plenty of room, at least 6 to 8 feet, each way.

HALE'S BEST

333 A medium size, very early sort, slightly oblong, but well netted and very attractive. Thick flesh, deep orange color, extensively planted in the commercial muskmelon growing districts. Price: Pkt. 5c; oz. 8c; ¼ lb. 25c; 1 lb. 75c, postpaid.

Green Fleshed Varieties

HONEY DEW

337 A late variety which does better in the South than in the North. Is smooth, has a white rind with green flesh, very sweet honey-like flavor. Price: Pkt. 5c; oz. 10c; ¼ oz. 28c; 1 lb. 90c, postpaid.

EARLY HANOVER

330 Without question, the earliest muskmelon grown. Small, oblong variety, just a shade larger than Rocky Ford with thick green flesh. One of the most prolific sorts. Price: Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. 90c, postpaid.

STANDARD ROCKY FORD

344 This is the old green-fleshed "granddaddy of them all" that made Rocky Ford famous. We have found a carefully selected strain, which will please you. Price: Pkt. 5c; oz. 8c; ¼ lb. 25c; 1 lb. 80c, postpaid.

MIXED MUSKMELONS

331 Give the boys an ounce of this for their own melon patch. Contains all of the varieties listed above and many more. I am sure you will find some that you never knew existed. Price: Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 65c, postpaid.

FROST-PROOF PLANTS

These Frost Proof plants can go out real early since frost doesn't harm them. First thing in your garden. I ship at proper planting time so get your orders in early.

Can supply either yellow or white Bermuda or Riverside Sweet Spanish. Price: 300 for 50c; 500 for 80c; 1,000 for \$1.50; 3,000 for \$3.50, all postpaid to you. Write for prices on larger quantities.

THE FAMOUS HAZELNUT SIZE

These hazelnut-size, small sets go farther than the large ones and will give you just as big onions at lower cost per A. They cost us more but we sell at same price as unscreened sets.

ONION SEED, SETS AND PLANTS

WHITE VARIETIES

313 WHITE SWEET SPANISH. Large, mild and sweet. Pure white. A much better keeper than the Bermudas. Does better in the north. Price: Pkt. 10c; oz. 20c; ¼ lb. 75c; 1 lb. \$2.25, postpaid.

311 SILVER SKIN or WHITE PORTUGAL. A medium sized globe, somewhat flattened. A good keeper, very attractive. Price: Pkt. 5c; oz. 25c; ¼ lb. 65c; 1 lb. \$2.00, postpaid.

307 NEW QUEEN. Small to medium size. Just the thing for pickling. Sow rather thick and don't thin out. Price: Pkt. 5c; oz. 25c; ¼ lb. 65c; 1 lb. \$2.00, postpaid.

My seed peas are northern grown, the quality is exceptionally good, and they are free from weevils. The best that grows. Plant the smooth varieties just as soon as you can get into the ground. One pound of seed will plant a row 50 feet long. Peas should be inoculated for bigger crops. Large pkt. inoculation, 10c, postpaid.

ABOUT RADISHES

A garden wouldn't be a garden unless it had radishes in it. Everyone who has a patch of ground as big as a table top should raise at least a part of his own radishes. These varieties are all good ones.

Plant 4 or 5 different kinds. One ounce of seed will make a row 100 feet long and when you figure how many bunches you can get from a 100 foot row, you can easily see what a money maker it is. Make several plantings.

One ounce will plant 50 hills. Plant after the soil is good and warm.

SQUASH SUMMER, FALL OR WINTER

ABOUT SQUASH

Squash likes rich loose soil and plenty of room—at least, 10 to 12 feet apart. Use plenty of seed. Bugs sometimes play havoc with the seedlings but you can get them with Bug Dust. (See page 42.) Large seeded sorts figure about 25 hills to the ounce of seed and the small seeded ones about 50 hills to the ounce of seed.

Here in the middle states I find it stands squash bugs and pests much better than most kinds. Some seedsmen say it is bug proof, but I don't claim quite that much for it. ABOUT HYBRIDS

You've heard me talk a lot about my Mule-Hybrid field corn. Hybrid Sweet Corn is **JUST** as valuable, if not more so.

Hybrid Sweet Corns are bred to resist disease which causes loss of crops in so many sections. They yield **MUCH** heavier than ordinary sweet corns, and better than this, the quality is improved in tenderness as well as size and fullness of ear.

Plant Hybrid Sweet Corns. The increased yield and better quality more than pay for the seed.

The three varieties to the right are my choice of over 36 different varieties tested and checked in my trial grounds. I know they'll please 100%.

YELLOW VARIETIES

Have Most Vitamins

GOLDEN BANTAM

177 I don't know of anyone who doesn't like to set his teeth in an ear of Golden Bantam. It is recognized as the standard yellow sweet corn. Grows 4½ to 5 feet tall, very productive, early, tender, sweet delicious flavor. Price: Triple size pkt. (3 oz.), 10c; ½ lb., 15c; 1 lb., 25c; 3 lbs., 65c, postpaid.

EARLY SUNSHINE

174 A full week earlier than Golden Bantam with a larger ear carrying 10 to 12 rows of creamy, yellow kernels. Fills well, is very tender and surprisingly large for such an early sort. Price: Triple size pkt. (3 oz.), 10c; ½ lb., 17c; 1 lb., 25c; 3 lbs., 65c, postpaid.

GOLDEN COUNTRY GENTLEMAN

179 The one I used to talk so much about last spring. A glorified golden Country Gentleman. Sweetest and finest flavored corn grown. Has all the good points of Country Gentleman and the fine flavor of Golden Bantam. Very prolific. Usually grows three ears to the stalk, averaging nine inches in length. Price: Triple size pkt. (3 oz.), 10c; ½ lb., 20c; 1 lb., 30c; 3 lbs., 75c, postpaid.

WHITE VARIETIES

COUNTRY GENTLEMAN

189 Sometimes called Shoe-Peg or Zig-Zag because of irregular formation of kernels. Long slender grains with ears just the right size for eating on the cob. Very tender and sweet. Heavy producer. Fine for canning. Price: Triple size pkt. (3 oz.), 10c; ½ lb., 17c; 1 lb., 29c; 3 lbs., 75c, postpaid.

EARLY MAYFLOWER

183 Another extra good white variety. Very uniform. Ears attractive; quality considered better than ordinary. Price: Triple size pkt. (3 oz.), 10c; ½ lb., 17c; 1 lb., 29c; 3 lbs., 75c, postpaid.

HOWLING MOB

180 A large ear, mid-season sort. Fill in with this and you won't have to wait long for the late roasting ears. Twelve to fifteen rows of pearly white. Price: Triple size pkt. (3 oz.), 10c; ½ lb., 17c; 1 lb., 29c; 3 lbs., 75c, postpaid.

EARLY EVERGREEN

181 An early addition of the regular Evergreen sort. Deep white grains. Price: Triple size pkt. (3 oz.), 10c; ½ lb., 17c; 1 lb., 29c; 3 lbs., 75c, postpaid.

SILVER BANTAM

"The White Golden Bantam"

STOWELL'S EVERGREEN

188 Don't try to make gardens without this one. Standard variety for both home and market gardener. Plant this one for canning and drying as well as for the roasting ear season. I always maintained it had more corn to the cob than any other variety. Stays in milk stage a long time. Price: Triple size pkt. (3 oz.), 10c; ½ lb., 15c; 1 lb., 25c; 3 lbs., 75c, postpaid.

Let the Kids Grow POPCORN and PEANUTS

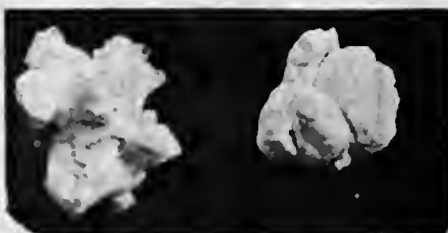

EXTRA MONEY FOR YOU

I know of a boy who raised 500 lbs. of popcorn on a small town lot and sold it for 5c per lb., netting him about \$25. Wouldn't you like to do that? You can. Popcorn has brought an unusually good price the last two years and I don't know of a better way for the boys to earn a little extra money than to raise it.

Takes about the same care as field corn except that you plant it a little closer if you want to.

JAPANESE HULLESS

195 Recognized for years as the standard variety of popping corn. Pops out snowy white, very tender and without annoying hulls. A sharp pointed, deep grained corn, with short, chunky ears. Price: Pkt., 10c; ½ lb., 20c; 1 lb., 30c; 3 lbs., 75c, postpaid.

GIANT POPCORN

197 SOUTH AMERICAN (ARGENTINE GIANT). Pops out in large, creamy-yellow grains. Large ears and smooth grain. Yields heavily. A vigorous grower. Price: Pkt., 10c; ½ lb., 20c; 1 lb., 30c; 3 lbs., 75c, postpaid.

SUPER GOLD

(See Picture On Cover)

198 I've grown popcorn since I was a boy. It's still one of my favorites. Every time I hear of some new I get it. Super Gold was originated by the Kansas College. It has everything—volume—most thirty to one. Practically hullless. Color—a rich creamy yellow; yield—better than the best of them. Vigorous and drought resistant. Price: Pkt., 15c; ½ lb., 25c; 1 lb., 40c; 3 lbs., 95c, postpaid.

RAINBOW POPCORN

194 Dozens of different colored kernels on each ear. All the way from white, ivory, yellow, pink, red, purple; in fact, every imaginable color. That's why we call it Rainbow. Pops fine. Price: Pkt., 10c; ½ lb., 20c; 1 lb., 35c, postpaid.

GOLDEN PEARL

192 A small deep golden colored variety of fair-sized ears, pops in unusually high volume, creamy yellow flakes. High producer. Very tender; no hulls; stock limited. Price: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c, postpaid.

POPCORN FOR POPPING

Practically hullless type of a big, yellow kind. Literally blows the lid off the kettle. Customers report a volume test of twenty-five to thirty to one. Not suitable for seed. Price: 8 lbs. for \$1, postpaid, zones 2 and 3. Add 15c for zone 4.

HOW TO GROW PEANUTS

Yes, you can grow peanuts in this climate just as well as not. They don't yield quite as heavy as they do in the south, but they do yield enough to give you plenty to feast on all winter.

Plant just like beans, in soft loose soil, after it gets thoroughly warm in the spring. Thin to a foot apart in the row and keep well hoed.

PEANUT & POPCORN SEED OFFER

¼ lb. of **JUMBO** and **EARLY NORTHERN PEANUTS** mixed. Enough **JAP HULLESS POPCORN** for a big town lot.

All for 25c, postpaid

EARLY NORTHERN

219 Small, well filled pods with lots of them on the vine. Will ripen anywhere in the corn belt. Price: ¼ lb. 10c; 1 lb. 30c; 3 lbs. 75c, postpaid.

JUMBO

218 Great big kind. Plant them the same time you plant beans. Not as early as the Early Northern but you are reasonably sure of a crop here in this section. Price: ¼ lb. 10c; 1 lb. 30c; 3 lbs. 75c, postpaid.

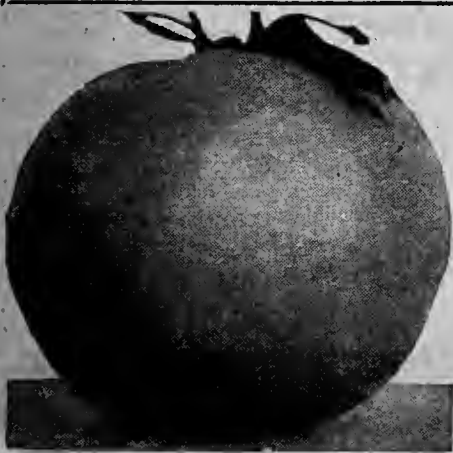

RED HEAD

401 I introduced Red Head a good many years ago. Since then we have been constantly working on it to make it better. I will put it up against any other early variety. It is a heavy yielding sort, bears over a long time. The tomatoes are round and smooth, they ripen evenly, and very seldom crack. The firm flesh makes it a fine canning sort. Price: Pkt. 10c; 1/4 oz. 20c; oz. 35c; 1/4 lb. \$1.00, postpaid.

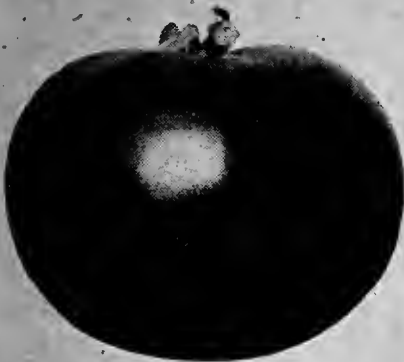

FIELD'S EARLY JUNE

402 Another good extra early one. Not as large as some and doesn't yield as much as some, but makes it up in earliness. Medium size, rounding, flat, dark red, fine for slicing. Price: Pkt. 5c; 1/2 oz. 15c; oz. 25c; 1/4 lb. 80c, postpaid.

MARGLOBE

405 Another dependable wilt-resistant main crop. Vigorous grower, medium large, nearly globe shaped, smooth and solid. The quality is extra fine, and it is an outstanding tomato for canning. Deep scarlet. Price: Pkt. 5c; 1/2 oz. 15c; oz. 25c; 1/4 lb. 80c, postpaid.

NEW STONE

415 A great main crop variety for canning and general use. Solid, smooth, ripens evenly, bright scarlet, a good yielder. Price: Pkt. 5c; 1/2 oz. 15c; oz. 25c; 1/4 lb. 80c, postpaid.

OXHEART

409 Entirely different from any other kind of tomato. Large, heart-shaped, pink-skinned variety. The flesh is thick but very tender. It has few seeds. Somewhat late and a great deal after the style of Ponderosa. Has a distinct, appealing, mild flavor. Price: Pkt. 10c; 1/2 oz. 35c; oz. 60c; 1/4 lb. \$2.00, postpaid.

PEAR TOMATO

The old fashioned pear shaped preserving tomato. Fruit is borne in clusters. No. 419 YELLOW PEAR. No. 406 RED PEAR. Price: Pkt. 5c; 1/2 oz. 15c; oz. 25c; 1/4 lb. 80c, postpaid.

SCARLET CLUSTER

413 We introduced this one last year. It's everything that a gardener might hope for. Good sizes, smooth, brilliant scarlet color throughout with thick flesh and small seed cavity. Ripens from the inside out and doesn't crack. Price: Pkt. 10c; 1/2 oz. 25c; oz. 40c; 1/4 lb. \$1.25, postpaid.

TOMATOES

About Tomatoes

I've tried out a lot of different varieties of tomatoes and I've discarded all but the best of them. These varieties are the pick of the lot, over a period of the last 40 or 50 years. My seed stocks are extra select, pure, uniform, and they have to be right. Plant both early and main crop sorts, so you will have plenty.

OTHER EARLY SORTS

(Not Pictured)

FIELD'S RED BIRD

421 Next to Red Head, I claim this is the finest early tomato I ever found. It is another one of my own introductions. Grows to a medium size, round, very smooth and seldom cracks. The color is a beautiful bright red. It is a dandy in every way. Price: Pkt. 10c; 1/2 oz. 20c; oz. 35c; 1/4 lb. \$1.00, postpaid.

BONNY BEST

408 Apple shaped, second early. Fine for forcing, great for canning. Medium size. Vigorous grower. Bright scarlet. Price: Pkt. 5c; 1/2 oz. 15c; oz. 25c; 1/4 lb. 75c, postpaid.

EARLIANA

411 One of the best of the early red tomatoes. Vigorous, spreading vine, bearing bright scarlet, medium size, nearly globe shape fruit, in clusters. Price: Pkt. 5c; 1/2 oz. 15c; oz. 25c; 1/4 lb. 80c, postpaid.

BREAK O'DAY

404 A recent introduction of the U. S. Dept. of Agriculture, used a great deal by truckers and market growers. It is resistant to wilt, the fruit is globe shaped, smooth, large, flesh firm and of fine quality, a bright scarlet color. Price: Pkt. 5c; 1/2 oz. 15c; oz. 25c; 1/4 lb. 80c, postpaid.

EARLY BALTIMORE

422 I got this one from the University of Illinois in 1935. It's a second early, wilt and disease resistant, somewhat smaller than the old-fashioned Baltimore, fruits are smooth, ripen early, bright brilliant red with a small core. Good for market gardening or canning. It is particularly adapted to our midwestern hot, dry weather. Price: Pkt. 10c; 1/2 oz. 20c; oz. 35c; 1/4 lb. \$1.00, postpaid.

OTHER MAIN CROPPERS

SCARLET SLICER

(Pictured on front cover.) Here's the new one for you. It's deep red fleshed. Its heavy foliage helps it to withstand drought and hot winds.

It's the ideal slicer (very round and smooth) and is good for canning, too. Special price: Pkt., 25 seeds, 20c; 1/2 oz. 60c; oz. \$1.00, postpaid.

423 PRITCHARD. A new wilt-resistant variety. I tried it out both here in the trial grounds and in my garden in Missouri, and taking it all the way around, it is the finest main crop tomato I know of. The fruits are very solid and heavy, smooth, globe-shaped, a rich deep scarlet color, mild flavor, and fine for tomato juice. It has distinct topping habit, and can be planted closer together than most sorts. Price: Pkt. 5c; 1/2 oz. 15c; oz. 25c; 1/4 lb. 80c, postpaid.

417 RUTGERS. I found this one in New Jersey. After trying it out here for a couple of years, I am ready to believe that it deserves a place in every garden. It starts ripening on the inside, and you can depend on it being thoroughly ripe all the way through. Doesn't have a hard core, and is outstanding for its uniform deep red coloring. Flesh is firm. Globe shaped. An excellent canning variety. Price: Pkt. 5c; 1/2 oz. 25c; oz. 40c; 1/4 lb. \$1.25, postpaid.

418 PONDEROSA. Here's one you just can't beat. It is too tender and doesn't hold up well for market, but for home use there's nothing like it. The fruit is large, sometimes inclined to roughness, but very tender and meaty. Slices beautifully with few seeds. Vigorous grower. Price: Pkt. 5c; 1/2 oz. 20c; oz. 35c; 1/4 lb. \$1.00, postpaid.

412 GOLDEN BEAUTY. Large, main crop yellow variety. Quite a novelty but well worth having. I like it. It's smooth, medium size, mid-season to late, fine for preserves or for table use. Price: Pkt. 5c; 1/2 oz. 15c; oz. 25c; 1/4 lb. 80c, postpaid.

This new strain is the earliest I've found yet. Some are ripe by June 30. All varieties ripe by July 10.

"ICE BOX" SIZE

All of the varieties are individual size, about 8 or 9 inches through. Fit in an icebox without cutting. No slice left over to get tough.

FLAVOR AND COLOR

Sweetest ever. That's why Mrs. Field asked me to call them "Sugar Lumps."

Most are red, some varieties are pink, some white, orange and yellow. All are good and I want you to try all colors and sorts so you can tell what you like best.

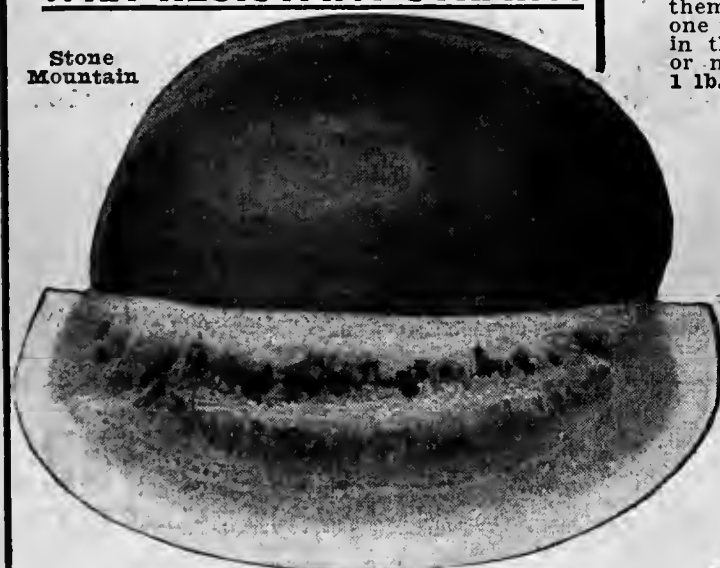

PRICE

Not much seed (1st year offered) but I've made a mixture of the best sorts.

Two Very Popular Melons

Kleckley
Sweet

KLECKLEY SWEET

704 Probably the best known melon in America. The measuring stick by which all other varieties are compared. Large, cylindrical in shape, weighs around 35 lbs. Dark green, flesh bright red. Very tender and sweet. Price: Pkt., 5c; oz., 8c; ¼ lb., 20c; 1 lb., 55c, postpaid.

ABOUT MELONS

I want every farm to have a big watermelon patch. Even the back yard gardener should raise a few hills of them. Nothing will make the boys happier than a good melon patch of their own. My melon seed comes from fields grown especially for seed crops. Melons like warm loose soil. Give them plenty of room, at least 10 ft. each way. Figure about 50 hills from an ounce of seed, or 3 pounds to the acre.

FIELD'S FOURTH OF JULY

708 Twenty thousand of my customers bought seed of this variety last year. It's one of the earliest melons grown. Average weight, 8 to 10 lbs. Color is a deep green, marked with lighter stripes. Rind is exceptionally thin (not over ¼ inch). Flesh is dark red, tender, fine grained, unusually sweet and rich. Last year seed cost 20c per packet. This year I have a lot. Price: Pkt., 10c; oz., 25c; ¼ lb., 75c; 1 lb., \$2.00, postpaid.

711 EARLY CANADA. I am listing this one for the first time this year. It is fully as early as my Fourth of July, and to tell the truth about it, I think it is most as good in quality, too. The size is medium. The outside color is a greyish green, almost white, with a fine green netting. The rind is very thin, the flesh bright red, and the seed mahogany brown. It will weigh from 10 to 15 lbs. on good soil. Price: Pkt., 10c; oz., 15c; ¼ lb., 35c; 1 lb., \$1.00, postpaid.

717 ICE BOX PRINCESS. Nowadays that everybody has an ice box, they are looking for a small sized melon to fit it. The Department of Agriculture at Washington, D. C., is spending a lot of money trying to develop a little melon. It is just the right size to serve one person perfectly. Flesh is a clear red, clear to the rind. Rind is very thin. It's sweet and of the finest quality. My stock seed originally came from Hungary. Price: Pkt., 5c; oz., 15c; ¼ lb., 30c; 1 lb., 90c, postpaid.

701 STATE FAIR MELON. This is the big Jumbo kind that you saw at my Jubilee. I used to take them around to the State Fairs and challenge anyone to raise bigger ones. They mature nicely here in this section. Melons often weigh 100 pounds or more. Price: Pkt., 10c; oz., 15c; ¼ lb., 35c; 1 lb., 90c, postpaid.

722 DIXIE QUEEN. A recent introduction. It is a great shipper, and a fine melon for the home garden. It produces an unbelievable number of melons. The flesh is crisp and tender, and has the fewest seeds of most varieties. The rind is thin, but tough. The color is striped light and dark green. Deliciously flavored, rich color. Price: Pkt., 8c; oz., 15c; ¼ lb., 40c; 1 lb., \$1.00, postpaid.

713 FORDHOOK EARLY. One of the best of the early varieties. Fine for home use, doesn't grow as large as some, but just a handy size for home. Short, blocky and thin rind, flesh tender and sweet. Price: Pkt., 5c; oz., 10c; ¼ lb., 20c; 1 lb., 65c, postpaid.

707 CHILIAN. A 15 to 20 pound melon, medium early, round and striped. Flesh deep red, crisp and fine flavored. Just the thing for the family garden. Price: Pkt., 5c; oz., 10c; ¼ lb., 20c; 1 lb., 65c, postpaid.

705 BLACK SEEDED KLONDIKE. I recommend it highly. It carries the highest sugar content of any melon that I know of. Oblong, medium size, dark green rind, and small black seeds. The flesh is a beautiful sparkling, deep red, very crisp and tender, without a trace of strings. Price: Pkt., 5c; oz., 15c; ¼ lb., 35c; 1 lb., 60c, postpaid.

709 TOM WATSON. An old favorite shipping sort, similar to Kleckley's Sweet. Firm, red flesh with a hard rind. Price: Pkt., 5c; oz., 15c; ¼ lb., 35c; 1 lb., 60c, postpaid.

702 GOLDEN HONEY. A beautiful yellow fleshed melon that makes a novel home or market sort. Large, oblong shape, weighing around 20 pounds. Rind dark green, with irregular stripes. Flesh a tender, crisp, delightfully flavored bright yellow. Price: Pkt., 5c; oz., 10c; ¼ lb., 30c; 1 lb., \$1.00, postpaid.

712 MOON AND STARS. Quite a curiosity. Dark green, oblong variety with yellow spots an inch or more across which represents the moon, with many small yellow spots around it representing the stars, hence the name. The quality is good and it's well worth planting. Price: Pkt., 10c; oz., 15c; ¼ lb., 35c; 1 lb., 90c, postpaid.

716 KANSAS SWEET. A new, big round melon that looks like the old Kolb Gem. Has thin rind, light green with broad dark green irregular stripes. The flesh is solid red, and the seeds are buff color. Price: Pkt., 7c; oz., 15c; ¼ lb., 30c; 1 lb., 90c.

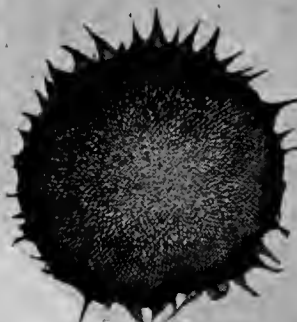

WATERMELONS MIXED

This is a specially fine mixture for a boy though I sell thousands to folks who haven't been boys for a long time. It's a thorough mixture of 25 kinds so you have all sorts at all times. Find room for at least a quarter pound and you'll be tickled pink with the melons. No. 710—Big packet (over 1 oz.), 10c; ¼ lb., 25c, postpaid.

OTHER CHOICE GRAPES (Not Pictured)

CACO—A bigger, red grape with a better, sweet flavor. Always loaded even in the hottest summers. Makes finest red jelly. Don't fail to plant Caco. Clusters about 6 inches long.

NIAGARA—Most popular white grape. Highest quality. Excellent eating grape. Clusters very compact with so many grapes in each one. Very outstanding at our 1937 Jubilee fruit show.

PORTLAND—White. One of the first grapes to ripen and one of the finest. Spicy, rich flavor and sure to bear.

BETA—The hardiest grape I know of. This is what I have on the trellis in front of my house. Grows fast and bears heavy. Fine for arbors. Fruit not so large and clusters more sound than most, with a nice flavor—having the tang of a wild grape.

AGAWAM—Rich, red, large with spicy rich flavor. Clusters very compact and large. Many say this is the finest wine grape.

Very early, rich black variety always loaded and always enjoyed. The first mammoth clusters taste so good picked right from the healthy, vigorous vines. Does well all over the middle west. Prices below.

ABOUT GRAPES

Grapes are one of the finest fruit we can grow here in this country. They're hardy, prolific, and if you can tell me what tastes better, I wish you would.

Grow them on a fence, or an arbor, or in your vineyard. Plant 6 to 8 feet apart in rows 6 feet apart, and be sure to try all of them. Each variety is superior for some reason and comes into bearing at a different time so you have grapes all year. One of the collections I have may be just what you want.

All plants are big, heavy rooted. 2 year vines—none better.

TENDER RED RHUBARB

Eating Rhubarb is about the nicest way I know of for keeping healthy, especially when it's bright red and tender like this strain I grow. Plant plenty of it this year. It's easy to grow and perfect in sauce, pie or canned. Plant three feet each way in good garden soil.

5 Heavy Rhubarb 25 Asparagus **79c Postpaid**

Golden Muscat—\$1.25

(Pictured in color—page 2)

\$1.25 for a Grape?

Yes, and it's every bit worth it or I'll admit I don't know a miracle when I see one, and it is a miracle, too—a miracle of plant breeding.

WHAT IS IT?

It's the big eating California grape made hardy as Concord. It's the big branching kind with branches that wouldn't fit in a giant basket because they're so big and heavy.

IS IT GOOD?

Nothing better. Big, golden yellow, juicy grapes, sweet as sugar, and vines are as hardy as weeds. If you want California grapes, but object to paying the fancy prices asked in stores, you can grow enough of your own in one year to pay for the vine.

PRICE—Big 2 yr. plants (pruned ready for planting)

\$1.25 each; 2 for \$1.95 Postpaid

If you order this along with any other nursery stock, I'll make you a special price of 98c each, postpaid.

IMPROVED PERFECTION

CURRANTS and GOOSEBERRIES—They go together

CURRANTS

CHERRY CURRANT. Best for jelly. Just can't be beat. Extra large and mighty pretty color.

IMPROVED PERFECTION. Large bright red berries just cover the plants. Good flavor and very popular.

Big 2 yr. old plants, alike or mixed, 25c each; 5 for \$1.00; 12 for \$2.00; 25 for \$3.75, postpaid.

ABOUT PLANTING

If you have room to turn around in, you have room to plant currants and gooseberries, and the two seem to go together—Gooseberries for pie and currants for jelly.

Plant in any odd corner of your place about 3 feet apart each way, and forget 'em.

GOOSEBERRIES

DOWNING—This has been the favorite for years and still is the best. It has large, pale-green berries that make prize-winning preserves and jam.

ELBERTA

(Freestone yellow). The most popular and no wonder. Big, rich, yellow, highly colored fruit. Heavy, sure bearer, and fine flavored. The peach that everybody likes. It's the standard by which other peaches are judged. You must plant Elberta. August 30th to Sept. 15th.

PEACH SEEDLINGS FOR WINDBREAKS

Most Missouri, Kansas and other southern farmers use a lot of these. Peach makes a fast growing, low growing windbreak besides bearing a lot of fruit.

These are of a good size and very heavy rooted.

25 Trees For 98c Post-paid

POLLY PEACH

Super hardy, sure-to-bear variety. Big freestone—white overlaid with rich red blush. Keen flavor and juicy. Introduced by Iowa State College. Produced a big crop of peaches 12 years in succession. Fine for canning as it is very firm. Next to Hawkeye, I believe this is the hardiest, surest to bear. Same price as other varieties and also a Special 3 to 4 ft. grade, postpaid. 35c each; 2 for 60c; 5 for \$1.25.

J. H. HALE (Freestone-Yellow). Extra large size and rich yellow overlaid with red coloring. One of the best I had in Missouri. Ripens a few days ahead of Elberta and tastes as good as any peach you've seen.

HEATH CLING (Clingsome-White). Best to preserve or pickle whole. Late in ripening and keeps extra good. September 25th.

MAYFLOWER (Semi-cling-White). The earliest peach to ripen and really popular because it is the first fruit. Fruit medium size and a beauty with crimson colorings. Often called "Frost Proof" because it blooms late enough to miss the frost.

CHAMPION (Freestone-White). Very hardy in the central states. Has size and quality. A honey-sweet, rich, juicy white peach you'll rave about. Ripens around August 10th.

GOLDEN JUBILEE (Freestone). Beautiful new red and yellow color and good size. Hardier than most and growing more popular each year. Flesh is yellow, tender, juicy and sweet. July 20th.

NEW HARDY HAWKEYE (See picture page 2)

Absolutely the hardest peach I've ever seen. Has extra sweet flavor, ripens in August and the trees are loaded. Fruit yellow with red blush. Medium size, and trees always loaded down.

This tree is the result of twenty-five years selection and propagation. Bore a big crop in '27 after the coldest winter in twenty years.

My own introduction and sold only by Henry Field. Supply limited.

3/4 ft. 50c; 5 for \$2.00, postpaid.

4/5 ft. 75c; 5 for \$3.00, not prepaid.

HARDY PEACHES

ABOUT PEACH TREES

I've watched peach trees and crops a good many years. Some varieties are pretty sure bearers, and some aren't worth a rap. You can be sure I'm not offering you shy, poor bearers. Listed on this page are the varieties I plant and believe in.

Plant fifteen feet apart or 190 trees to the acre. Plant peaches as fillers in your apple orchard.

All my trees are big, soon-to-bear, heavy rooted and I've priced them right. Dates given after varieties indicate approximate ripening date. This may vary according to weather conditions.

HERE ARE REAL TREES!

It's the Roots that Count

If you buy trees without roots, you're just paying out good money for so many broomsticks.

I've seen samples of trees from some nursery companies that were no better than broomsticks. They were the kind of stuff we throw out—they wouldn't grow if you watered them with Cod Liver Oil.

Most all fruit trees (like other nursery stock) have among them some good trees, some fair trees, some fair to bad trees and some awfully scrawny ones. I insist on throwing out all the poor ones because you want a tree that will start quick, grow well and bear soon.

The trees above are a sample. Generous grading as to size and only the finest, cleanest stock used. You'll be pleased 100%.

I'm not just saying this to be talking about how I run my business. I'm saying it because I know you're interested in whether or not you'll get good stuff from Henry. Well, if you hadn't been getting good stuff, I wouldn't be in the same business I started in 60 years ago, would I? Think it over. H.F.

This is BARTLETT

A Bartlett is the fanciest and finest of all. Very early.

PLANT A PAIR OF PEARS!

No, I'm not joking—I mean it. Everybody should have two or three pear trees. They grow upright, take so little space and always are loaded. Plant both summer and winter pears. Wrap the winter pears in paper and forget them until mid-winter. See how good they taste then.

These are big, heavy, well rooted trees, ready to grow and will bear worlds of fruit.

Prof. Hansen's Hardy Hybrids

HANSKA. (Apricot Plum.) A dark purple plum. The flesh is yellow and very aromatic. Flavor on the apricot order. Big fruit.

OPATA. Bears when very young. Trees are always loaded. Watch that you don't break the limbs with too much fruit. Reddish-purple outside and yellow meat. Grows on any soil and of good quality.

SAPA. Fruit dark purple outside and inside. Bears every year and like Opata is just covered. Extra fine to eat off the tree or for cooking.

WANETA. Just about the best plum I know of. Fruit is great big, red on the outside and crisp sweet juicy yellow inside.

UNDERWOOD. (American.) This was my favorite at Centerville this year. Bears regularly and fruit is immense. The big, red freestone plums ripen in July. A beautiful plum to look at and a delicious one to eat. (Not a Hansen variety.)

COMPASS CHERRY PLUM. A perfect cross of two favorite fruits (cherry and plum). Superhardy, will stand any amount of cold or hot weather. In size, like a plum, fruit rich red and tart. Branches are absolutely lined with fruit. Low growing—plant 10 to 12 feet apart.

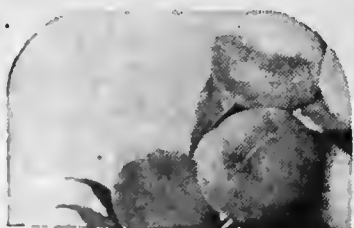

Prettier, nicer plums there never were, than these Hardy Hybrids. This is Hanska.

ALL THE WORLD LOVES THE ROSE

IT'S QUEEN OF THE GARDEN . . . AMERICA'S FIRST CHOICE IN FLOWERS
SO EASY TO HAVE ALL YOU WANT—IF YOU PLANT MY BIG 2 yr. PLANTS

CLIMBING ROSES

Paul's Scarlet

Plant 6 to 8 ft. apart on fences or trellis. All big 2 year old plants.

39c each; 3 for \$1.00; 12 for \$3.50, postpaid.

PAUL'S SCARLET—If you can have only one climber, and if you like red, then this is the one you'll love. Most people do not stop with one but trail its glory the full length of the back fence by setting one at each post. The individual blooms are of the large tea-rose type and their blazing red does not fade.

PINK PAUL'S SCARLET (Chap-lins)—Large semi-double flowers of apple-blossom pink; an unusually strong grower. Will cover a trellis the first year.

CLIMBING AMERICAN BEAUTY—The individual blooms cannot be distinguished from those of its hot-house name-sake. Big rose pink fragrant beauties on long wiry stems.

BUG DUST Gets Rose Slugs. See Page 42.

EXCELSA—The Mildew-Proof Crimson Rambler. Great clusters of double bright red blossoms. Very rapid growing too.

MARY WALLACE—Do know this lovely fragrant climber better. It's a rose pink bloom on a long strong stem. Beautiful foliage.

SCORCHER—A new vermilion red rose that has an everblooming blood. No other rose like it.

DR. VAN FLEET—Large flesh pink buds of tea-rose shape open into blooms very large for a climber. Profuse bloomer with luxuriant, waxy foliage.

DOROTHY PERKINS—The big clusters of double pink flowers make a cloud of color. Imagine the mass of pink on a trellis behind the pale blue of your Delphiniums or the white of your Regal Lilies.

GARDENIA—The yellow rambler. The open flowers are really a deep ivory but the buds are yellow. One you can depend upon in every way.

1 EACH of the two varieties pictured 69c Postpaid

SIX OF THE NEW ROSES

My Choice of All the New Ones, Usually Sell \$1.50 to \$2.00. See My Low Prices.

MCGREDY'S SCARLET—Double, high-centered, new brilliant scarlet shaded rose-pink. Long, strong stems. 49c ea.; 3 for \$1.25.

HEINRICH WENDLAND—Absolutely unique. Large, double blooms of very good color, two-toned red gold. Strong grower. Heavy blooming. 49c ea.; 3 for \$1.25.

PORTADOWN—A real treasure. A McGredy Rose of rich, deep crimson. Long buds and blooms, double and lasting on strong upright bushes. 49c ea.; 3 for \$1.25.

HEINRICH GAUDE—Long pointed buds of a brilliant Nasturtium red color. Flowers are large, double, high centered and of ideal shape. It blooms freely and continuously. 59c ea.; 3 for \$1.50.

SUNKIST—A cop-per-orange sport of Joanna Hill which it closely resembles in shape of bloom and growth of plant. The blooms are fully double, borne on long, straight stems and are extremely lasting as cut-flowers. 49c ea.; 3 for \$1.25.

MME. JOS. PERAUD—The long, slender and pointed Nasturtium orange buds open to sweetly fragrant flowers of a charming Nasturtium buff straying to a lovely shade of shell pink at the petal edges. The nearest approach to a pure buff. 49c ea.; 3 for \$1.25.

BABY ROSES

(POLYANTHUS TYPES)

Even harder than hybrid teas. Each bush is covered with hundreds of blooms. You'll hear Mrs. Fischer "rave" about them. The large flowering types have blooms almost as big as the hybrid teas.

Big 2 yr. plants 39c each; 3 for \$1.00; 12 for \$3.50, Postpaid, except when otherwise stated

GRUSS AN AACHEN

One of the perpetual questions is whether this is a Polyanthus or a Hybrid Tea. Its individual creamy-pink altogether lovely double blooms are as big as most teas, but they come in great clusters, constant succession and form bushy, well foliaged plants. 49c each; 3 for \$1.25; \$3.50 per doz.

BABY TAUSENDSCHON—Clusters of large size, semi-double, shell-pink flowers exactly like those on climbing "Thousand Beauties" but on low bushes and everblooming. Beautiful for cemetery use.

CAMEO—Brand new and different. Big flowers of shell pink and salmon with a glow of gold. 49c each; 3 for \$1.25; \$3.50 per doz.

CATHERINE ZIEMET—An indispensable rose for the garden or perennial border. Always covered with its dainty little double white roses and fine cut foliage.

EDITH CAVELL—Brilliant scarlet crimson clusters.

ELLEN POULSON—This is a lusty pink one. Like Catherine Ziemet, it is always ready to hand you a bouquet. Has charming buds and good foliage. For the grave of a child, nothing could be lovelier.

ELSE POULSEN—Always in bloom. Big clusters of apple blossom pink. A hardy bushy rose.

GOLDEN SALMON—One of those vivid "different" colors that is gorgeous massed against evergreens or with pale yellows. It blooms further into the fall than any other rose. I have picked them in December, in Iowa.

IDEAL—The deep black-red baby rambler. Blooms so profusely it hides the leaves. Fine for filling stations, beds and cemeteries.

KERSTEN POULSEN—A very attractive, tall growing variety that blooms constantly with large clusters of open scarlet flowers. A new one you'll be proud of.

MRS. FINCH—At last we are able to secure for you this large flowered, double bright pink Polyanthus, with pointed buds. Very hardy.

SPARKLER—Another large blooming type in a brilliant sparkling red. Very new and most glorious.

TRIOMPHE ORLEANSAIS—Finest of all red Baby Roses. Free flowering and so striking—flowers in big clusters.

THESE 2 YR. HYBRID TEAS BLOOM THIS YEAR FROM JUNE TO FROST • CHOICE 3 FOR \$1.00

ABOUT ROSES

Don't know any one thing that is so absolutely perfect—color, fragrance, continuance of bloom, as the rose. If I was dictator, I'd see that everyone had a rose garden. Now-a-days, the home grown rose looks so much like its greenhouse sister you can't tell them apart.

I sell only big 2 yr. field grown hybrid teas, the best in the world—all state inspected and approved. They'll bloom from June to frost every month of the year. Buy the best.

RED HYBRID TEAS

AMI QUINARD—Rich velvety, almost black-red. Great big bud and full flowers. Holds its dark red color. Fragrant.

ETOILE DE HOLLAND—One of the finest crimson red roses in every way. Free blooming with beautiful velvety buds on long stems. You'll always use buds of this rose at the flower shows.

E. G. HILL—Quite new outstanding, big full deep crimson. As the flower opens, it grows darker red. Always attracts attention. Very fragrant.

GRUSS AN TEPLITZ—The hardiest and most free blooming of all roses. Good glossy foliage. Blooms entirely cover the plant from one side to the other. Flowers not so extra large but there are so many of them every day that this rose will live up your rose bed more than any other. Fine where other roses have trouble growing at schools, cemeteries and filling stations.

MARGARET MCGREDDY—A vivid scarlet with a touch of orange. Buds perfect for cutting with extra long stems.

RED RADIANCE—Guess you know Radiance roses are the best. Hardy, free blooming, full flowers that should be in every garden. The color is so distinctive that Radiance Red is often used to describe the color of other flowers.

OLYMPIAD—On extra tall stems, the great scarlet-crimson buds open to flowers of blood red with copper shading at base.

PINK HYBRID TEAS

THE WORLD'S FINEST

BETTY UPRICHARD—Extra hardy. Upper side of petals light pink. Reverse dark pink with orange tint. Buds perfect and blooms no matter how hot.

BRIARCLIFF—Big pink flowers edged with cerise. A greenhouse favorite because it lasts so long. Stems long and stiff so you'll want this rose for cut flowers.

DAME EDITH HELEN—One of the largest and most perfectly formed deep pink roses in the world.

MRS. CHAS. BELL—(See Salmon Pink Radiance).

PINK RADIANCE—Best to bloom, best to resist heat, drought and disease of all the pink roses. Flowers big, full, brilliant rose-pink. Loaded down with blooms all summer long.

SALMON PINK RADIANCE (MRS. CHAS. BELL)—An exquisite color with all the good qualities of the Radiance family. Somewhat lighter pink than Radiance with a glow of salmon color.

SOUVENIR DE GEORGES PERNET—Long rich brick red buds opening to the most enormous rich pink blooms. When fully open sometimes 6 to 7 inches across.

SOUVENIR M. C. CHAMBERD—New in the rose world with a new color. Long pointed coral buds unfold to coral pink. Blooms tinted peach. Sturdy, healthy, free blooming. A coming rose. 49c each (can be included in 3's or 12's at regular price).

WILLOWMERE—Big, full flowers of soft shell pink on long sturdy stems all summer makes this one of my favorites.

TWO-COLOR HYBRID TEAS

LADY MARGARET STEWART—Brilliant orange turning to burnished gold as it ages. Hot weather won't hurt it. Plant lots of these for cut flowers.

LOS ANGELES—Flame pink, toned coral and gold. A striking vivid rose that you will rave about.

MADAM EDOUARD HERRIOTT—Coral buds opening to salmon orange blossoms.

PRESIDENT HOOVER—If you ever see this rose, you won't rest until you have its beauty in your garden. Glorious cerise, toned yellow, orange, and scarlet. Buds long, painted and perfectly shaped. Have a group of these for bouquets.

SISTER THERESE—New. Rich yellow with crimson markings on the petals. Almost a pure yellow. A very free bloomer with the sweet briar fragrance. A new rose you'll love. 49c each (may be included in orders for 3 or 12 at the regular price).

TALISMAN—Think of gold, rich scarlet, yellow and orange, all blended in one flower. Buds are like greenhouse roses and stems so long. No rose garden is complete without this rose.

How to Plant ROSES

Plant in rich, well drained soil about 18 inches apart. Prune back to about 5 in. and mound up dirt 5 or 6 inches deep until buds swell (10 days) and then remove. From then on they'll grow like weeds. In winter, hill up dirt around each plant and cover with straw.

SOUVENIR DE CLAUDIUS PERNET—Long pointed buds of sunflower yellow. Many people like this best of the yellow roses for cutting.

HYBRID PERPETUAL ROSES

Super-arctic hardy. Grow any place. Loaded with big double blooms in June and some varieties bloom all summer. Winter hardy as a polar bear. Plant 2½ ft. apart.

F. K. DRUSCHKI—The perfect white rose, loaded in June and again in September.

BLACK PRINCE—Deep velvety maroon and extra large. Perfect flowers.

AMERICAN BEAUTY—Rose of romance. Large fragrant deep pink. No other rose will ever be better known or liked.

GEN. JACK (JACQUEMINOT)—Deep glowing red. An old favorite still popular. Each branch just weighted down with flowers.

PAUL NEYRON—Largest of all rose blossoms; sometimes as large as a bread and butter plate. Perfect pink.

SHRUB ROSES THEY NEVER DIE

Grow and thrive like shrubs in any location. If you want roses you can "forget about"—plant these.

AUSTRIAN COPPER—Like the old-fashioned yellow garden rose except that the flowers are intense copper-red with reverse petals in vivid golden yellow. The sturdy parent of the whole Talisman tribe.

HARRISON'S YELLOW—The yellow rose which grew by your grandmother's door. They are back in style, both for the shrubby border and for hot locations.

HUGONIS—Earlier than Harrison's Yellow.

GROOTENDORST—Mrs. Fischer's favorite. Perfect as shrub for hottest, driest part of your yard. Covered with clusters of double flowers, size of rambler roses, from June to November. Red or pink, your choice.

AGNES—Copper yellow. Fragrant double flowers of large size, all fruited all summer. A new hybrid Rugosa.

WHITE MEMORIAL (Wichuriana)—This is the white rose that makes a blanket of waxy leaves for a grave cover where grass will not grow.

RUGOSA-HANSA—A sturdy shrub rose with large leaves and double flowers of violet pink. Absolutely hardy.

ABOUT ROOTS

Got tired of telling you shrubs are 12 to 18" high or 18 to 24". You don't care about that. Good roots and branches are what you care about. You don't care a rap for a big, spindly shrub with poor roots.

So, here's how I'm grading my plants.

SELECT PLANTS—Big, healthy roots and lots of branches like I've always furnished.

EXTRA SELECT—Cream of the crop with extra big roots from good growing condition and lots of branches.

THIRD GRADE—Thrown away. Not fit to mail. (DON'T BUY this grade somewhere else. Not fit.)

HOW TO PLANT

No need to say much about this. Every nursery order I send out has complete instructions easy to follow.

Mostly, low growers are planted 2 feet apart, medium growers 3 feet apart and the tall growers 4 feet apart. Set out, at least 18 inches from building foundation.

The important thing is to have shrubs planned so there will be something blooming all season.

Quick Shade!

CHINESE ELM

"The Quick Shade Tree — Loves Drought"

QUICK SHADE

When people ask me how to get a big shade tree quick, or how to get a tall windbreak in 2 or 3 years, there's only one answer and that's Chinese Elm.

Honestly, it grows like sin—from 8 to 10 ft. a year. And it's a big tree giving shade before you can turn around.

DO THEY DIE EASY?

No. A Chinese Elm is as long lived as the average shade tree and longer than a lot. Paul, in the Nursery Dept., has a picture of one growing in Siberia (where the seed came from) that was over 200 years old. That's not short lived, is it?

WHY SO POPULAR?

People, 3 years ago, just couldn't believe everything said about Chinese Elms at first. But some folks tried them and became so enthusiastic, they told all their neighbors and their neighbors told their neighbors and so on.

Now, it keeps us humping just to keep up with the orders. But I'm glad to see it. A Chinese Elm customer is a happy, satisfied customer.

EASY TO GROW

That's another thing about Chinese Elm.

They don't grow because of good soil and good weather. They grow despite everything. Drought doesn't hurt them—poor soil doesn't hurt them and extreme temperatures only make them more healthy.

Up in So. Dakota, Chinese Elm is about the only tree being planted because it's the only tree that stands the 110° weather in the summer and the 30° below in winter.

You just can't stop them from growing.

FROM SIBERIA

All my seed originally comes from Siberia where only the hardest of trees can survive. Be sure you buy the GENUINE SIBERIAN STRAIN.

ABOUT PRICES

Prices are low this year. It's a good year to buy. When shortages occur, the price advances fast. Buy what you need this year. They'll have an extra year to grow.

SEEDLING TREES FOR QUICK WINDBREAK

HOW TO PLANT WINDBREAKS

Plant, if possible, 100 to 150 feet away from the house for best results. Plow a deep furrow where trees are to go and tamp seedlings in furrow carefully. Haul some water to the trees, if you can.

Trees should be 6 to 8 feet apart in rows 8 to 10 feet apart for best results. Plant in staggered (zig-zag) fashion for best protection.

The important thing is to PLANT EARLY. They'll do much better for you if you do.

USES OF EACH VARIETY

CHINESE ELM—For quick windbreak clear to the ground, drought resistant.
BLACK LOCUST—Best to prevent soil washing. Used by the Government.
OSAGE ORANGE—For windbreak and fence posts.
MULBERRY—Grows fast. Good fruit.
HONEY LOCUST—Long lived.

ABOUT PERENNIALS

A body can't have everything, but if you ever come close in the flower line, it will be with perennials.

Every year they come back, without much fussing on your part, to bloom and bloom and then bloom some more.

Give them a little sun, a little shade, a little care and then forget them until they bloom your garden full of fragrance and color.

HOW TO PLANT

Don't let anybody say perennials are hard to raise. They aren't. In fact, there isn't much of anything easier to grow than that's anywhere near as pretty.

Plant in good soil, worked up well with top of clump about 1/2 inch below the surface. Mulch in fall with straw to prevent heaving.

That's all there is to it. Is that hard?

FREE

Customers who order or get together a club order of \$2.00 or more of perennials from pages 34, 35 and 36 may select any 19c perennial on these pages and I'll send it to you extra.

Yes, I'll send the other free gifts on page 3, too.

FIELD SEED

"SEED SENSE"

If you have any questions about field seeds—how, when or what to sow, send them in. Glad to answer best way we know.

Also glad to give you special quotations on big quantities of field seeds. Just write Henry Field, Shenandoah, Iowa.

NOTE:

Last year 60 million pounds of Red Clover were sowed in U. S. This year there are only 30 million pounds in the country. (Government figures.) Only ½ as much as normally sown.

Alfalfa is not quite as scarce, although NORTHERN grown seed is VERY scarce. Alsike is just ½ a crop. Sweet Clover is going to be \$4 higher by spring.

All this combined with heavy demand because of seedlings lost last summer means advancing prices. The situation is serious. Stock up NOW and be safe. H.F.

Red Clover—Warning

Red Clover seed is scarce—therefore high. No higher now for the early buyer than it was last March at seeding time. But it IS going higher—and that means buy what seed you want now, if you want to save money and IF YOU WANT TO GET SEED.

Remember, with what the Government pays you for seeding Red Clover, your seeding costs no more to you than if the price was down to \$8 a bushel, or less. And the fellow with Red Clover is going to be the one to cash in on the high prices that will be paid for Red Clover seed the next 2 or 3 years.

But buy early this year OF ALL YEARS. You'll never regret it. (Special early prices on enclosed price list.)

Adapted Seed Only

I have for sale and will offer for sale only HARDY, ADAPTED Red Clover and alfalfa complying with government Soil Conservation requirements.

I have NO unadapted foreign seed and I do not recommend it. The Government will not make any payment if you sow it.

Beware of seedsmen offering seed too cheap. LOOK CAREFULLY FOR STAINED SEEDS. The Government stains all UNADAPTED SEED so you can tell it easy. Stay away from it.

Back to Alfalfa

Somehow Alfalfa and rich farmers go together. You never see one without the other. The sooner we get ground sowed back to Alfalfa the better for everybody.

You all know I have good alfalfa seed. Preached it since before most of you knew what alfalfa was. But I want you to notice especially the REGISTERED State-Sealed Grimm on the price list. It's from Alfalfa John's alfalfa ranch and is about the prettiest seed I've ever seen.

Dry Weather Grass

(Brome Grass)

Out in Nebraska, about all they are sowing is Brome Grass. They've had it so hot and dry, nothing else would grow, but Brome Grass just seems to like it that way.

Besides that, Brome Grass stands cold weather like an Eskimo. It just won't kill out. There are fields right around Shenandoah, 17 years old and the finest looking pasture you ever saw. Stays green all summer.

Brome Grass will carry 50% more cattle than Blue Grass and makes 3 to 4 tons of hay in 2 cuttings. It's extremely high in feeding value and cattle like it. What more could you ask?

All the State Colleges urge that every farm have 10 A. or more for sure feed. They're right. No farm should be without it.

Sow alone 14 lbs. per A. or sow 5 lbs. per A. with 10 lbs. of any of my Permanent Pasture Mixtures. Big seeded, so you usually sow it separate. (Early prices on enclosed price list.)

Brome—The "Dry Weather Grass"

ATLAS SORGO—The Giant Fodder Crop

This is a picture I took out at Sleepy Hollow when we harvested our Atlas Sorgo this fall. Stew wanted to show how tall it grew, so he climbed up on the car while Alfalfa John and Pate held up a couple stalks so you could see it better.

I tell you, folks, this Atlas Sorgo is a miracle

crop. Drought doesn't faze it, grasshoppers won't touch it and it grows up ten and eleven feet high making tons of the best feed ever. Cattle eat it like I eat chicken. It's sweet and they don't leave a bit of it.

If every farm don't have ten acres of Atlas, it won't be my fault. (Free leaflet on request.)

CERTIFIED SEED

STATE-SEALED STATE-REGISTERED

Every pound of my Atlas Sorgo is CERTIFIED AND REGISTERED BY THE STATE and is SEALED in bags to insure your getting GENUINE SEED.

All the original seed stock is carefully selected from hand-rogued fields and is REGISTERED BY THE STATE. There can be no mixtures or off-type seed when the state registers it.

This is service performed to protect YOU. Even if the seed cost you more to sow (which it doesn't), it would be worth it 500 times over.

My sealed seed is packed in 100 lb., 50 lb., 25 lb., and 10 lb. bags. Any of the above sizes or multiples of them are STATE-SEALED. Where else can you get seed that way?

92% Germination Guaranteed

I absolutely guarantee that my Atlas Sorgo will germinate 92% or better. Try and find ONE other seedsman who can do this.

Atlas Sorgo, you know, has a light seed-coat which allows it to take up moisture easily. Here, in this climate, local grown seed is often so high in moisture that just a light freeze cuts the germination down to 50% or even lower. I know. I've seen it happen.

But, my Atlas is, every bit, stored under controlled heat and moisture conditions. I want the seed you get of me to GROW.

Don't Take a Chance

Now and then somebody offers ATLAS for sale for a cent or two cheaper than I sell it. Usually, it's just odds and ends lots picked up helter skelter over the country.

In the first place, you don't know for sure it's GENUINE Atlas—the kind that makes tons and tons of sweet, palatable fodder. Chances are, it's full of mixtures and won't yield as much as corn. GENUINE Atlas will yield twice as much fodder as corn!

In the second place, even if you could buy that seed cheaper, (chances are you can't) that's only 10c to 20c less per acre and, if GENUINE Atlas won't yield enough MORE, to pay that 10c back 50 times over, I'll eat my hat.

In other words, I know my seed is good and know lots of Atlas seed offered is mighty poor. I leave it up to you. Which is the smartest to buy?

WHAT IS SAFE FROM DROUGHT? SAFE FROM GRASSHOPPERS? SAFE FROM CHINCH-BUGS?

The answer is Atlas Sorgo. It likes dry weather and grasshoppers and chinch bugs won't touch it. It's really insurance on a sure feed supply.

Right now Atlas is the answer to most farmers' feed problems. A bigger acreage went into Atlas Sorgo last summer than ever before. This year, I predict twice as much will be sown as last year.

Atlas gives twice as much fodder as corn and cattle like it. They don't leave a bit, because it's sweet.

Colleges Recommend Atlas

The popularity of Atlas Sorgo spreads from one state to another, just as fast as seed is available. Kansas introduced it, then Missouri and Nebraska picked it up and recommended it 100%.

Prof. C. A. Helm, professor of Field Crops at the University of Missouri, wrote Alfalfa John and said, "... WE RECOMMEND ATLAS IN PREFERENCE TO ALL OTHER SWEET SORGHUMS FOR SILAGE OR FORAGE." And when Prof. Helm says that, it means something because he knows sorghums backwards and forwards.

And when state colleges get behind something like they are behind Atlas, it means it MUST be good.

How to Sow Atlas

Sow 6 to 10 lbs. per Acre. The more you sow the finer the stem and the easier to cure. Plant shallow—not over an inch deep or less. Use large corn plate running full speed and plant single rows, same distance apart as corn.

Harvest with corn binder.

10 Acres on Every Farm

The Universities of Missouri and Nebraska are urging every farmer to have at least 5 to 10 acres of Atlas for feed. They say it's insurance. If drought and grasshoppers take the rest of your feed you will always have a bumper crop of Atlas.

Even if the other crops do well, the Atlas fodder or silage will be mighty welcome.

Read What Your Neighbors Say

"We can't say too much for your Atlas Sorgo. We have 20 A. of it and it stands 10 to 11 feet high. It is the best all-around feed you can have. You can feed it to all the stock. And the seed makes fine feed. It will yield 20 Ton to the Acre. Tell everybody to plant Atlas Sorgo."

Arthur H. Reuther, Route 1, Argyle, Iowa.

"To say I am pleased with your Atlas Sorgo is putting it mild. The yield is wonderful. Grew 9½ to 10 feet tall."

Arthur T. Boney, Cairo, Mo.

"Your Atlas Sorgo is the best looking fodder I ever grew and will make three times as much fodder as corn on the same ground."

Wm. Stewart, Fairfax, Mo.

SUDAN—God's Gift to Farmers

Here's the answer to your summer feed problem—Sudan. Sow right after corn planting and by July 1st, it will carry more head of livestock per Acre than any other pasture crop known.

Every farmer should have 5 to 10 Acres of Sudan along with some Atlas and Hay Soybeans.

Right now, Sudan is mighty cheap. ($\frac{1}{2}$ last year's price.) And at 25 lbs. per Acre (seeding rate I recommend) that's real cheap feed!

P.S. That's me looking over Sudan growing in our trial grounds at Shenandoah.

What Every Farm Needs

NOTE: With other seeds high, these 3 annual crops will cut your seed bills and give big yields of hay, pasture, and fodder.

Right now, early buyers can buy all 3 at $\frac{1}{2}$ their price last year. While most seeds are higher, **THESE THREE** can be bought cheap, if you buy NOW. Later, they too, will go higher.

—H. F.

This year, every farmer is thinking about summer feed, winter hay and fodder and how to get them.

Here's my idea of how to have all three easy:

1. Put in from 5 to 10 acres of Sudan for summer pasture. It will carry more live stock per acre than any pasture crop I know. Even if you have good pastures, Sudan gives them a rest and furnishes summer feed when they are dried.

2. For hay, put in Soybeans. Of course you will put in Alfalfa, too, but beans give you quick hay and lots of it—hay high in protein. Beans build up your soil, too.

3. For fodder—there's nothing better than Atlas Sorgo (if you use registered seed free from mixtures).

I say that any farmer who plants all three is going to be well off. He'll have his own feed regardless of drought, cinch bugs, grasshoppers, windstorms, hail, hares and high water. Am I right?

Red Clover Substitutes

Adapted domestic Red Clover is high. Here's how to save money on Red Clover. Rather than have you sow unadapted foreign seeds, I have made up substitutes for Red Clover that would save you money and still qualify for government payments.

They are listed in the big sack (at right). They are ideal mixtures and save you money. Only ADAPTED domestic seed used.

Want Service?—Try Me!

Most of you know already, but there's no harm in bragging a little more. I've got good field seeds and good service worthy of a little talking about. Here's what a Field customer gets.

ONE DAY SERVICE—Order shipped same day it's received.

FREE PLANTING ADVICE—Any information about seeding crops, etc., is yours free for the asking.

SOLD ON APPROVAL—Any seeds, if not satisfactory, can be returned within ten days and money will be promptly refunded or we'll exchange it.

NO CHARGE FOR SACKS—They are weighed in free.

SAFE ARRIVAL GUARANTEED—All seed is guaranteed to reach you in first class condition. We pack everything carefully.

TESTED SEED—All seeds are carefully tested for purity and germination. If it is not good, it is not sent.

If there's anything more you want, chances are I'll do it for you, if you write. Anyway, let's have your field seed order. I'll give you your money's worth.

BLUE STEM FOR SALE

Remember those old native pastures? They'd be worth their weight in gold, if we had them back here now.

Well, we can. I have seed of the old native Blue Stem that our forefathers knew so well. No need to describe it. Everybody knows it and wishes they had it on their farm.

This is the first time this native grass has been harvested and seed offered for sale by a seed house. It's a scarce article these days but while it lasts it's 30c per lb. postpaid. Let's bring back the old native pastures.

The old native Blue Stem grass.

The New Kingwa Hay Soybean

Another thing every farm needs this year is good hay Soybeans. These are the new KINGWA beans. It's the finest I've seen for hay—very erect grower, easy to harvest and a heavy yielder.

Other good hay beans are Wilson and Virginia, and for grain, plant Manchus and Illinis.

I don't care which you like best. They are all good. What I want to see you have is good high-in-protein hay this summer and that means, put in Soybeans.

NOTE: Early buyers can buy beans at $\frac{1}{2}$ of last year's prices. Later demand, because alfalfa shortage will switch customers to beans, mean higher prices. Moral is, buy early.

How to Sow Pasture Mixtures

Sow early—while the snow is still on the ground if you can or with the break of spring. Disc, harrow and sow about 11 lbs. per A. Then roll with a heavy roller or cultipacker, if you can. Don't get it too deep.

No need to use nurse crops, though you can if you like. We don't advise more than $\frac{1}{2}$ normal seeding of grains.

Write Me

If you don't find just the mixture you ought to have, or aren't sure, write me, and tell me what soil you have, upland or lowland, etc., and I'll advise the right pasture mixture for it or tell you how we can fix one up to suit your conditions. I'm glad to do it for you, too.

Pasture Mixtures

More and more farmers are realizing the need for well balanced pastures. The days of sowing 1 grass alone are about over.

A good pasture can make more money for a farm than any one crop and it isn't hard to have. A good well balanced mixture is the ONLY good way. With a variety of grasses and legumes, you have a stand in any season and pasture from early spring until winter.

Alfalfa John has done a lot of work with Professor Hughes at Ames and other important agronomists and has worked out some fool-proof, scientifically balanced mixtures.

Without bragging, I believe we have the finest, most carefully balanced pasture mixtures in the country. ONLY ADAPTED seeds used.

Hay and Pasture Mixtures

NOTE: ONLY ADAPTED Red Clover and Alfalfa, ELIGIBLE FOR GOVT. PAYMENTS, used in these mixtures. Beware foreign seed. Low, opening prices are on yellow price list enclosed.

Lot "50-50"

Always my most popular seller. The finest, top-quality permanent hay and pasture mixture you can buy. Thirteen different clovers and grasses, 50% clovers, 50% grasses. Grows anywhere. Gives perfect, heavy pasture all season—early to late. The 45-lb. bu. sows 4 acres.

LOT "50-50" WITHOUT SWEET CLOVER—Same as above, but sweet clover left out and other legumes increased. For land that won't grow Sweet Clover.

"Good But Cheap" Mixture

Made to save you money. Perfectly balanced hay and pasture mixture. Eight different legumes and grasses in just the right proportion for ALL-SEASON pasture. A real bargain in a balanced mixture. 45-lb. bu. sows 4 acres. Very cheap. See price list.

Red Clover—Timothy—Alsike Mixture

With Red Clover high, this mixture cuts your cost and is practical for regular rotations. Will not prevent raising Red Clover seed crop as Alsike and Timothy do not make second crop for seed.

Correctly proportioned to meet government specifications. Sow 11 lbs. per acre. Low prices on yellow price list enclosed.

Sweet Clover Mixture

Save money on Sweet Clover. Plant this mixture of Sweet Clover, Red Clover, Timothy and Rye grass. Makes quick pasture, good hay this fall, and can be plowed under for soil improvement. Bushel sows 4 acres. SAVES MONEY. See price list enclosed.

"Hurry Up" Mixture

For quick pasture, before any other feed. Bushel (45 lbs.) sows 4 A. See low prices on price list.

My Famous MULE HYBRID Seed Corn

(See Prices on Yellow Sheet Enclosed)

A Little History

Back about 1912, I started experimenting with Hybrid corn. About the same time, Sec. of Agriculture Wallace did.

I had good corn, too, and called it Mule corn. The name has stuck and lots of folks still call Hybrid corn Mule corn.

This is the same corn—only a later model—more improved. I claim there is none better and few as good and I can prove it.

Why Mule Hybrid Is Better

Here are the reasons, short and quick, why Mule Hybrid is better. All the poor characteristics were bred OUT of the corn and all the good ones bred IN. You'll see for yourself when you harvest it next fall.

1. **HEAVY YIELDS**—These are guaranteed.
2. **DROUGHT RESISTANCE**—It's long roots go deep for moisture and yields heavy, drought or no drought.
3. **RESISTS COLD**—For early spring planting.
4. **FARMER STYLE CORN**—Sound, heavy ears, but not flinty.
5. **RESISTS WIND**—Strong roots and strong stalks—can't blow over.
6. **LEAFY**—An extra lot of good, dark green leafy fodder.
7. **RESISTS CHINCH BUGS.**

I could name 50 more, but these are enough. Everyone will be proven to you next fall at harvest.

Guaranteed Hybrid Is New

Yes, I guarantee my hybrid. I guess I'm the only person who does. I don't know whether other seedsmen can or not, but the answer is, they DON'T.

My idea is, with so many different hybrids offered to you, you don't know which is best. Well, here's one that's guaranteed, because it's one of the best grown. (See guarantee below.)

Write for Leaflet

I have a four page "Seed Sense" written about Mule Hybrid corn. It tells you all about my Mule Hybrid in detail. If you want a copy, it's yours for the asking.

GUARANTEE

I absolutely guarantee that the edge-drop or hill-drop grades of my Mule-Hybrid corn will yield enough MORE corn per A. planted under identical conditions to more than pay for the seed. If it should not, I will on proper proof, immediately refund to you, the purchase price of the corn.

In other words, it does what I say, or no deal.
H. F.

Plant Adapted Seed!

Beware of Hybrid corn companies with only one or two Hybrids to sell. They can't be adapted everywhere.

I have 7 Mule Hybrids, and 3 State College Hybrids. All good but for different localities. The map (left) shows where each number should be planted. The number is the number of days it takes to mature. Here's the list:

Mule Hybrid Varieties

- No. 100—(95 to 100 days) Matures like Minn. 13
- No. 110—Best early Hybrid. Yields 10 to 20 bu. more
- No. 116—Heavy yielder. Ears 10 to 12 in.
- No. 121—For central Iowa and like climate
- No. 123—Can't go wrong on this if you live south of Lincoln Highway.
- No. 125—We plant this at Shenandoah. See picture above
- No. 129—Supply limited. Southern folks—order early

Iowa College Varieties

- No. 931—Early. Good yellow
- No. 939—Central Iowa's corn. Heavy yielder
- No. 13—For Southern Iowa. Resists drought

Why Plant Hybrid Corn?

You plant Hybrid corn for the extra 10 to 25 bu. of corn per A. you get. And also, because it yields despite drought, windstorm or cold. Even if you only got 10 bu. extra per A., that's \$500 extra on 100 A. That buys a lot of seed, shoes and socks—(almost a new car).

Now-a-days, farmers realize they are foolish to plant anything but Hybrid. The important factor is to get good Hybrid—and that's what Mule Hybrid is.

Pay Only \$1.00 Down

A lot of folks want my Mule Hybrid held for them until they get money in to pay.

That's O. K. If you don't want to pay all now, send \$1.00 per bu. down, and I'll hold the corn for you until you send the balance, some time before March 1st.

Three Grades for Sale

On the price list enclosed, you'll see three grades for sale, one is for edge drop planter, one for hill drop planter, and one is a grade of Butts and Tipps—same hybrid as the other but not as fancy.

All my Mule Hybrid is dust treated.

Other Corn

Yes, I have open-pollinated corn, too. It's as good as ever and priced on enclosed price list. I recommend it as follows:

NORTHERN IOWA, SOUTHERN MINN. and SOUTH DAKOTA—Plant Minnesota 13 (yellow), Early Pride of the North, (yellow), Early Silver King (white), Golden Glow (yellow).

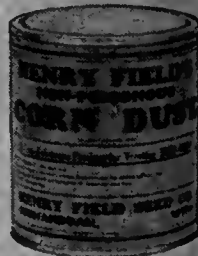

CENTRAL IOWA, NEBRASKA and NORTH ILLINOIS—Plant Pfister's Krug (yellow), Reid's Yellow Dent, Golden King.

FOR SHENANDOAH, LIKE TERRITORY—Krug's, Gold Mine, Reid's Yellow Dent, Silver Mine, St. Charles Red Cob (white), White Elephant, and Field's Utility.

LATE VARIETIES—Shenandoah Yellow, Boone County White, Yellow or White Ensilage.

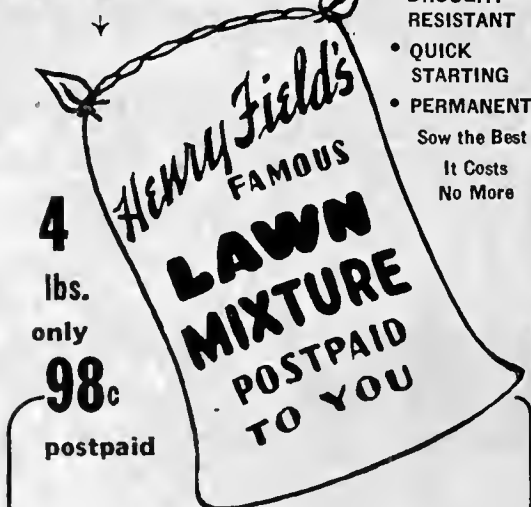

Corn Dust

Prevents disease and increases your yield about 4%. Also protects your seed from squirrels, rodents, etc. 1 pound treated 5 to 8 bu. of seed. 1 lb. can, \$1.00, postpaid.

How to Seed

Everybody's lawn needs thickening up just to keep out the weeds. If you want a lawn like the one in the picture, you can have it in a few weeks.

Get out real early in the spring, rake your lawn good, sow your seed and roll it with a heavy roller, or rake it in LIGHTLY and tramp it in solid.

Sow 1 lb. for every 200 square ft. of new lawn and 1 lb. for every 400 square ft. of old lawn (to thicken).

NOTE: EARLY SEEDING IS IMPORTANT. IF YOU LIKE, SOW YOUR SEED ON THE SNOW. The freeze and thaw will WORK IT IN the soil for you.

NOW IOWA'S LARGEST HATCHERY

Here I am again. This time inspecting the big modern sanitary incubators, which hatch Field's chicks. Our chick department has grown so rapidly that we now have Iowa's largest hatchery. This mammoth plant is located right across the street from the main seed house and visitors are always welcome.

I want to thank you friends for the mighty fine help you have given us. Every day, during the hatching season, we get orders from folks who say they have seen some of our chickens on their neighbor's farm and they want some just like them. Now, that is really being good neighbors and I say again that such help is appreciated.

Now that you have boosted Field's chicks to such an extent that we have Iowa's largest we are able to produce chicks for less money. Mass production means lower costs so we are able to use this saving to build up our flocks to still higher standards, to still higher production.

I guarantee that you won't find better chicks any place in America for the price we ask. We refuse to be undersold on baby chicks. Send us your orders and I will see that you get the most possible for your money and any time there is any price concession you will get the full benefit.

(Rotenone is 38 Times Stronger Than Arsenate of Lead & Non-poisonous)

NEW DISCOVERY

A new powder, Rotenone, recently discovered, is the secret. It's so much more powerful and still non-poisonous, that I predict 3 years from now—nothing else will be sold. You won't believe how good it is until you see it work.

SOLD ONLY BY HENRY FIELD

"Bug Dust" is for sale only one place in United States and that's right here.

I mix it, sack it, and ship it myself so I know it's just right.

TWO-BARREL ACTION

Bug Dust works two ways. It not only gets the bugs and aphids, but it also helps control disease on the plant, no need to buy two dusts—use "BUG DUST."

GUARANTEED

Absolutely guaranteed to do as I say, or your money back, no arguments.—H. F.

KILL THOSE BUGS!

PROTECT YOUR GARDEN!

BUG DUST CONTROLS

Garden pests—aphids, lice, worms, etc.

SAFE TO USE

Absolutely safe, you can dust it on lettuce and eat it without washing, if you want to, though you probably don't.

Won't hurt chickens, dogs or birds either, and it's easy to use. **CANNOT HARM THE PLANTS.**

DOES IT WORK?

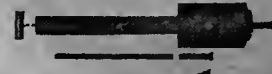

I'll say it does. I had over 4,000 letters from customers tickled pink over how it saved their gardens. They all say they've never seen anything like it and all come back for more.

Equally effective as a bug killer and cure for plant disease.

Of all the everblooming roses, I like the Radiance group best of any. Always, they are so large and beautiful, so fragrant and above all so hardy and free blooming.

Here's one each of the three colors they come in—red, pink and white. I think if I only could have three roses these would be the three.

And don't forget to notice, Henrietta, the new non-fade yellow rose is only 30c with this collection.
